Reasons comment:

1. Coal kills the climate - this is well proven by scientists. NZ needs to move into the

future using climate friendly alternatives and reduce emissions. 2. The mine supports an unsustainable model of land use that is intensive when NZ should be investigating sustainable farming such as an integrative method 3. Deplorable disregard for environmental degradation and threatens biodiversity. Bathurst has repeatedly breached their existing consents for discharge into local waterways which is the habitat of endangered Canterbury Mudfish. Why would they comply in the future? 4. Negative impact on local environment and community which includes an impact of biodiversity, noise dust, pollution of local waterways and landscape 5. This application demonstrated 19th century thinking rather than 21st century vision.

Consent comment:

Deny Bathurst Coal Limited all resource consents to continue operating. Deny consent to expand an open cast coal mine (known as Canterbury Coal Mine), including retrospective and future operation, at Bush Gully Road, Malvern Hills, in the Selwyn District.
