Reasons comment:

As a scientist monitoring the levels of greenhouse gases in the atmosphere I understand the

consequences of coal mining and burning for the climate and the environment. Continued mining and use of coal cannot be reconciled with the urgent action to protect a liveable environment. Any measures to increase the level of mining, or measures to support the latter and even continued use must be stopped.

Consent comment:

To deny all of the consents in order to protect the climate everywhere on earth, as well as local air quality, ecosystems, and environment.
