Reasons comment:

I was born in Christchurch in 1948 and my childhood was privileged that my family

believed in spending time in and around our wonderful lakes and rivers I watched with horror the degrading of those places until my grandchildren could no longer rely on being able to access these places, but worse still growing up in the Ashburton district couldn't rely on clean water ... my eldest grand daughter is about to have her first child and still the pollution continues and dairy is considered king in an area that was traditionally sheep and crops totally unsuitable for intensive dairy factories greed, not need won out I lived in Coalgate and we saw the rubbish dump idea come and go, the 70 metre dam, 80 metres from our house discontinued and now this need to grow coal removal there seems an ongoing plan to ruin the Malvern Hills area and for what to make things easier to provide the dirtiest fossil fuel to facilitate the drying of milk powder for export feels like New Zealand, and specifically Canterbury is going to swallow the poison of others greed..... overseas owners, immigrant workers on 6 month contracts, childrens unsettled education as a result, bulk buying bringing no money locally things need to be done differently our water needs protection, our rivers and lakes need protection, our biodiversity needs protecting, our soils need protection, trees, cut down for dairying need replanting Ecan, the first to acknowledge a climate emergency and following the first open elections, please don't now agree to this

Consent comment:

No consents to take more water for fossil fuel removal no consents for discharging waste in the use of removing fossil fuels.... no extra land to be sacrificed for the benefit of fossil fuel removal a clear message by your decision that you take seriously that carbon emissions need to reduce, starting now
