Reasons comment:

I strongly oppose to the application by Bathurst Coal Limited As a resident of Canterbury

and as a medical doctor I feel it is important we look to the future of the damaging decisions being made currently. This application risks irreversible climate change and damage to the environment. If we want our children and generations on to survive and thrive, it is imperative that we prevent ongoing global warming and damage to NZ ecosystem before it is too late. Electricity from renewable energy is plentiful in the South Island of NZ and could be further expanded given the correct investment. The production of coal is polluting and Bathhurst mines have shown neglect in protecting native waterways in the past, endangering native species. The extension of Bathhurst mine is directly in contradiction to the NZ Government policy of becoming carbon neutral. Finally, there is the destructive impact of this activity on the natural beauty of the environment to consider. We need to prevent these damages, before they are too late to reverse.

Consent comment:

Decline all of Bathurst Coal Limited's applications as listed above. Please stop expansion of the coal mine and further damage to the environment
