Reasons comment:

We are staring the devastation of our species through our negligence of the planet's

ecosystems to nourish the greed of those who have privilege and wealth. In return, we are told that they nourish and sustain an economy that we've watched come to a screeching halt over the last couple of months. Viruses don't discriminate, but preexisting inequalities are directly linked to the expansion of fossil fuel extraction, particularly wherever mining coal has been proposed. Consequently, I oppose all components of this proposal, so that future generations might hope to have our species survive the pandemics occurring as a direct result of exploitative fossil fuel extraction.

Consent comment:

I would like the competent authority to reject this application on the grounds that it jeopardises our ability to sustain our water quality, which is essential for future generations to be able to live.
