**Reasons comment:**

We have all just been through (are still going through) a global pandemic which has shown

through drastic reduction in traffic how strong the effect of people is in terms of climate change. We need to use this pause that we have been given to change old thinking about how we do things. In 2020 and beyond we need to not be using coal to dry milk. In 2020 and beyond we need to be preserving wetlands not damaging them further. In 2020 and beyond we need to be careful with our water.

---

**Consent comment:**

Please deny the consent for the open caste coal mine and the milk dryer. We need to think about smarter, greener economic activity.
