Reasons comment:

Increasing the size of the operation will increase the negative impact of mining on the

environment. In addition, it supports the use of coal to create milk powder, which itself supports the overuse of the environment through inappropriately intense agricultural practices that modern dairy farming depends on. It is very hard to understand the need, when Fonterra have announced that they are starting to move towards sustainable energy use in their creation of milk powder.

Consent comment:

decline consent for all the applications.
