**Reasons comment:**

Coal kills the climate. There are alternatives to coal that do not have such a negative effect

on the environment. Coals negative effect on the environment includes plants, animals, and people. Coal mining destroys the habitat of many plant and animal species. This includes the critically endangered Canterbury mudfish of which this mining operation is a threat to. This coal mine has a negative impact on local environment and community. Short term economic value is in no way worth the destruction of land and species. This mine supports an unsustainable model of land use. It is time for major changes in the way we as a civilization respect and care for the land and each other.

---

**Consent comment:**

Batbhurst's application for resource consents to enable it to extend its coal-mining operations at Canterbury Mines should not be approved.
