Subject: HPE CM: Canterbury coal mine extension
Date: Saturday, 9 May 2020 1:57:15 PM

MY WIFE AND I FULLY SUPPORT THE PROPOSED EXTENSION BY BATHURST MINE TO ITS MALVERN HILLS MINE.

With today's technology Coal is now the cheapest, and least damaging material for energy on Earth.

Coal releases carbon which is great for plant growth.

Without carbon nothing would grow!

Remember, coal is actually a plant.
