Reasons comment:

Canterbury Coal boost the local economy with its day to day running. Many locals are in their employment or directly benefit from their operation. The hospitals and dairy companies use their coal to fire their boilers, the technology of these has changed greatly and aren't the black smoke belching monstrosities of the turn of the century. They are clean and efficient systems with minimal emissions and proper scavenging facilities. In the time I have worked for CCL they have become more environmentally conscious and put it at the forefront of their operations. Every effort is made to leave the land in a better and more useable condition than before whilst doing everything possible to prevent pollution to waterways and soils in the surrounding areas. They are an asset to Canterbury.

Consent comment:

Give Bathurst Resources Ltd the consents they have applied for and allow them to grow as a company and within the community
