**Reasons comment:**

An expansion of the Canterbury coal mine would prolong air quality issues (dust and CO<sup>2</sup>)

emissions) and water quality degradation (dust, run off and sediment discharge) into waterways and wetlands for decades at a time when clean energy needs to be used. Fossil fuels are the main contributor of greenhouse gas emissions which are having a profound effect globally, but also locally with droughts and higher temperatures resulting in some agriculture being unsustainable without excessive pesticide use and large water consents. Please have thought for the future and decline the retrospective and future mining activity proposed by Bathurst Coal Limited.
