Reasons comment:

The Christchurch City council has declared a climate emergency. ECAN has declared a

climate emergency. We should not expand a coal mining. We need to stop digging coal up and stop burning it. Bathurst Coal need to wind down operations and transition to cleaner more renewable businesses. Canterbury continues to face water quality issues and degraded waterways - we do not need to be removing water and adding waste to the problems we currently face. Canterbury suffers from the worst air quality in the South Island, coal consumption contributes to this and coal production supplies and supports consumption. Finally, our wetlands contain irreplaceable biodiverse ecosystems - Canterbury has lost all too many of these, and it takes centuries to reestablish native flora and fauna – you're asking to destroy our current environment, so you can continue attempting to destroy our future environment.

Consent comment:

To prevent the expansion of coal mining in New Zealand.
