Reasons comment:

The Mine will have a huge negative impact on the local environment and community – as

well as irreversible impact on indigenous biodiversity, Selwyn District Councils own Notification decision report identified the impact of noise and dust, pollution of the local waterway, landscape effects and overall amenity values as being more than minor. Bathurst has also repeatedly failed to provide the required information on these issues. Bathurst Mines have breached consents in the past and will continue to do do, endangering protected species. There is no need to use low-grade coal as there are many alternate methods for providing heat to the factory. This Bathurst Coal Mine applications are in opposition to ECAN's commitment to act on climate change and contra to the Carbon Zero Bill.

Consent comment:

Bathurst Mine's applications for resource consent should not be approved.
