**Reasons comment:**

I cannot believe, when the science is irrefutable that greenhouse gases created by human

activities and particularly the burning of coal, are the cause of global warming that a project like this is being approved...it is insane...totally insane!!! We are heading for a minimum of 2 degrees warming ... up to 5 degrees which will make our planet earth totally uninhabitable for life as we currently know it, including for human beings. We must keep all coal in the ground and not burn the coal we have currently in reserves. Fonterra must invest in renewable energy to dry its milk powder ... this is the time to do it! I have a grand daughter, 1 yr old on 13th June. I want her to have a future on this precious planet that supported all human and other species until human beings began rapaciously exploiting the earths resources. Our activities must be in balance with nature ... we are part of nature and reliant upon it ... regardless of our 'sophistication'. The pandemic makes this abundantly clear. We are not superior to nature. We cannot control nature. We are polluting air, degrading precious environments, killing species though the extraction and burning of coal. It must stop NOW...no more coal mining...absolutely none!!!

---

**Consent comment:**

Oppose consent, totally!!
