Reasons comment:

Why I oppose these consent applications: We must stop producing and using coal if we are

to bring emissions down. The low-grade coal from this mine is used locally for industrial heating, a use for which climate-friendly alternatives exist. In 2019 ECan committed to declaring and acting on a climate and ecological emergency. As elected representatives, your primary responsibility is to the health of your local population and whenua. With the RMA clause being reviewed and is likely to be changed to be compatible with the Zero Carbon Act. In 2019. Disregard for environmental degradation and threat to biodiversity – Bathurst have repeatedly breached their existing consents for discharge to local waterways that are the habitat of the endangered Canterbury mudfish. We have no confidence they will not continue to do so. Selwyn D.C's own Notification decision report identified the impact of noise and dust, pollution of local waterway, landscape effects and overall amenity values as being more than minor. Bathurst has also repeatedly failed to provide the required information on these issues.

Consent comment:

On the above grounds I want consent to be denied
