Reasons comment:

I am making this submission due to concerns about the environment. These actions would

considerably endanger the biodiversity of the area. Our water sources are a precious resource and this extension to allow taking more water puts our water supply at risk. Discharging waste water in the area is also inappropriate given the damage this can cause to the environment. We also know that climate change is going to badly affect much of the environment and the way we're able to live and that we need to take drastic action to reduce climate impacts. Hence expanding the capacity of any coal company is unacceptable in this day and age with the knowledge we have about climate change risks and the consequences of allowing these types of activities to continue to operate, and even worse grow. This is why I am opposed to all elements of the application.

Consent comment:

I wish the consent authority to deny all aspects of the application.
