**Reasons comment:**

- significant negative impacts of the coal industry on emissions and climate change -

negative environmental impact of expanding and continuing this mining process - negative social impacts of the mine to the people of New Zealand who want a future that supports the environment, and those who have strong ties to the area in discussion

---

**Consent comment:**

Decline consent for expansion of coal mine and depending on impacts to current staff, decline consent applications for continued use. If significant grievances are to be caused to staff by decline of consent, consent for continued operations to be granted BUT decline of operations or limited operations until full close in 2 years time.
