Reasons comment:

The reasons for making my submission are as follows 1 on average Bathurst employs 38

full time staff over the year and employs an additional 12 to 17 extra staff at the peak of the season for 3 to 4 months of the year all within the Selwyn District 2 this adds about 11 million dollars to the district a year 3 if the coal was to come from the west coast or imported and that's all that revenue gone from this region and not just the jobs the carbon foot print from this would be huge and the increased truck&trailer movements would be something like 25 units a day in peak times 4 as Bathurst is a big supporter of the locale area school , golf club, school boy rugby, and the local museum just to name a few. 5 Bathurst Canterbury Coal is classed as an essential services over the covid 19 pandemic lockdown and thus was still able to work and kept all its staff in full time employment 6 having relay good positive feed back from work safe Dave Bellett [Deputy Chief Inspector High Hazards Unit who had called the day before to say he would be on site at 6-15 the next day and couldn't be leave how tidy the place is and how well its operated to a very hi standard and would like to bring other mine operators here to see that you can be a tidy min e site with grate rehab work and water controls if you would like to read his report please do contact me for a copy of this report 7 as the mine is located up a dead end road and cant be seen by the pubic eye BUT works very closely with the party's along the road to the mine AND 95% of people do not even know it is there or even operating

Consent comment:

id like the consent authority to approve this consent as to help out with employment and to help with the economic restart in this time and for the times ahead
