Reasons comment:

All coal extraction in Aotearoa needs to cease immediately. Coal has played a huge role in

climate change as well as destruction of native land. It is a poison this country has every ability to move away from. There is plenty of other decent paying work for people in this country to do, if the government starts investing in it.

Consent comment:

Decline in full all consent applications to expand coal operations, as well as consents to damage riparian environments, take water, or discharge contaminants or sediment.
