**Reasons comment:**

1) Coal extraction is not an appropriate solution for energy provision in the 21st century

given the spectre of climate change and in light of our government's commitments to address it. 2) Aotearoa has a commitment to protect its endangered species. These activities threaten the endangered kowaro. 3) Pollution from these activities threatens the health of our rivers and drinking water. Our waterways have been subject to an onslaught from commercial activities to the detriment of water quality. Our government has a goal to protect and enhance the health and wellbeing of all New Zealanders and does not prioritise economic wellbeing at the expense of our environmental and social foundations.
