Reasons comment:

Quite simply we are in a climate emergency and extracting more coal to support intensive

dairying which is irreparably harming our land, biodiversity and waterways is absurd. We should be investing in regenerative sustainable agriculture and leaving coal in the ground if we have any hope of delaying the damaging effects of climate change. In addition the increased vehicle activity, threats to biodiversity and pollution will have a huge impact on local land owners and residents for many years to come which is unacceptable. Bathurst has a history of not complying with consent conditions and I strongly oppose expansion of an open cast coal mine.

Consent comment:

To deny all consents supporting the ongoing operation of open cast coal mining.
