Reasons comment:

I oppose the consent applications for the following reasons. The proposed quarry site is too close to neighbouring properties. The Quarry site boundary is only 130 metres from Rangiora Eco Holiday Park which has permanent residences, 200 metres from a residential subdivision, 300 metres from a preschool and 350 metres from a public park. International

standards applied elsewhere in the world to quarry setbacks from neighbouring properties are 500 to 600 metres. The nuisance level and health hazards from dust produced by the quarry operation will be detrimental to those living close by. The negative effects that silica dust exposure can have on human organs. Those potential effects of crystalline silica exposure include: Silicosis – acute, accelerated, chronic, PMF Lung cancer Chronic obstructive pulmonary disease Tuberculosis Renal disease Scleroderma Rheumatoid arthritis SLE Sarcoidosis The noise generated by Quarry operations is significantly different by way of level and duration to those generated on the average rural zoned property. The proposed quarry site is situated in a Ground Water Protection Zone. This zone has been established to protect the aquifer that supplies a number of bores/wells and the reserve water supply for the Rangiora community. This aquifer must be protected from potential contamination. The proposed excavation down to "1 metre above the water level at the time" will be below the highest recorded water level (HRGWL), putting water in the aquifer below at risk. Remediating the quarry site by dumping potentially contaminated clean fill below the HRGWL could contaminate the aquifer. Diversion of flood waters will put nearby properties at risk. The mitigations proposed by the applicant do not adequately address the effects from the dust and noise generated or the loss of amenity value to the local community. Waimakariri District council has an obligation under Objective 12.1.1 of the District Plan to; Maintain the amenity values and a quality of environment appropriate for different parts of the District which protects the health, safety and wellbeing of present and future generations.

Consent comment:

I ask the consenting authorities to reject the following consent applications; Canterbury Regional Council CRC204106 – A land use consent to excavate material. CRC204107 – A discharge permit to discharge contaminants into air from an industrial or trade premise or process. CRC204143 – A discharge permit to discharge contaminants to land from backfilling with virgin excavated natural materials. CRC211629 – A water permit to divert floodwater. Waimakariri District Council RC205104 - A land use consent to establish, maintain and operate an aggregate quarry in the Rural Zone.
