**Reasons comment:**

I live on Huntingdon Drive and I can not believe that this ridiculous idea has made it this far. I live directly in line of the Norwest winds that will rip through the quarry and get funneled by the earth bunds. So do a lot of other residents including a childcare center, bustling bars, cafes and restaurants with outdoor dining/seating and a park are all 300m

away from the proposed area. We already get dust from the racetrack and even the Ashley river when it is blowing over 50km/h. No amount of watering will keep the dust down during a hot dry westerly. There will be no staff to control dust at night or on weekends and holidays. I along with others in the neighborhood also grow vegetables. I am not looking forward to lettuces full of quarry dust. Our house also has large sliding doors that will have to remain shut if the wind blows. Now for the noise. It will be horrendous. Large earthmoving machines noise can travel through most things, I have worked with them most of my life and know they do. It is simply far too close to full urban residential area. We should not suffer just because the racecourse is going broke and need money. I also being in the construction industry have not seen the need or demand to increase quarrying in the area anyways. This is by far the most ridiculous plan for a quarry that has ever been made. I didn't move here to be blanketed in dust all summer long and woken up to earthmoving machinery everyday whilst trying to enjoy the peaceful outdoor lifestyle we moved here for.

---

**Consent comment:**

I wish for this application to be denied and made so that no further applications can be made for quarrying within 5km or zoned residential housing.
