**Reasons comment:**

NW wind will blow dust into my property severely impacting my health and ability to enjoy my property. Bunds are shown on sides that will not minimize NW wind blown dust. No bund or plantings are shown that will reduce NW wind blowing dust directly into my house (and greater Rangiora). More suitable land should be available further west that

would not impact a township. Taggarts are saving travel time and fuel cost at the expense of my quality of life. I like having a green space close by but not if it is a source of dust that severely impacts my quality of life and health. Better option than a quarry would be council funded parks, sports grounds,etc that can co-exist with race track. That way taggart quarry will not be needed by racecourse as they will obtain income from council and community will acquire green space and facilities.
