Reasons comment:

The community's well being is at risk. Noise pollution will be an issue as will an increase in dust from the quarry process. Increased truck traffic to and from the proposed quarry site in River Rd will increase noise and diesel pollution. The ground water is going to be impacted by heavy vehicles working above it and shifting silt and sand through it. Bird life

and insects are going to be impacted by the vibrations of heavy machinery working in the area. Even farm animals and pets will be impacted. Quarrying leaves wastelands. The land is never the same again even with promises of returning it to its 2020 look. That is not natural. It disturbs eco systems. This being the case we need to preserve the eco system of the proposed site for Taggarts Rangiora quarry in River Rd. Natural deposits of stones exist outside an established community of 20000 people in the waimakariri district. Rangiora has become a haven for people following the Christchurch earthquakes. The negative impact on the residents of Rangiora by the proposed quarry in River Rd will be set in the cellular memory of each and every resident requiring emotional and mental and physical support for their well being. The vibration of the machinery will be very detrimental to all floral and fauna within this community as well. I say stop the quarry. Look after the residents and floral and fauna and water table of this growing town.
