Reasons comment:

I am very concerned about the possibility of a quarry at this location. I am nearly 80 years old and have recently moved here to be closer to family. I am alarmed to have unknowingly bought into an area where a quarry could go ahead. It will negative affect people's health and the environment. As I continue to age, it will have a negative impact on

my health, because I spend a lot of time outside. My garden is important to me - I grow my own vegetables - the silica dust will make it not only unpleasant but dangerous to be in. It is a high wind location - the dust will go everywhere, including on the food that I grow. I chose this area because it is a quieter area; the peacefulness will be eroded with extra noise and traffic. Another reason for choosing this area was for the availability of retirement villages nearby. If I need to shift to one of these retirement villages in the years to come, all of these negative impacts will continue. In addition, I am very worried about the possibility of ground water being contaminated. I understand the proposed quarry is located in a community water protection zone. It is completely inappropriate to locate it in this zone.

Consent comment:

Don't give consents for the proposed quarry at this location and any other nearby locations where it will be detrimental to the locals' health and the environment.
