Reasons comment:

It is my submission any retrieval of grey wacke gravel from the proposed quarry is hazardous to peoples health and will pollute the environment. The activity of quarrying produces silicone dust which is almost impossible to observe. It becomes airborne no matter what the weather conditions prevailing are, although rain would subdue the silicone

dust. The effect on peoples health can be damage to the lungs and respiratory systems which is serious.

Consent comment:

The reasons I oppose strongly the application are as follows. The effect on human life and animals. Environmental damage due dust borne silicone. High activity of trucks and trailers. Noise level. Flooding. Should the application be successful Taggart Earthmoving must be persuaded to set up a publicaly run group at Taggart Earthmovings cost to monitor regularly and at all times properly installed dust monitors contrivances, installed round the perimeter of the proposed quarry whereupon if a high dust reading is recorded, then Taggart operations must be shut down and the complete operation modified.
