**Reasons comment:**

We have recently built our first home which is about 700m away from the race course. This was never any mention about a quarry being established in our LIM report. the impact of a quarry being established this close to us would be diplomatic to our family's health and wellbeing. Not to mention the Value of our property will no doubt decrease

dramatically as no body would want to live near a quarry. And we would not have purchased if we had have known. I do not believe acoustic bunds would block out the noise that is produced from heavy machinery and the clouds of dust can be managed especially with the strong winds that we have in this area. We use to live on Johns road where they build the new primary school which was straight over the road from us. The constant noise and dust that was accompanied went through the entire house, clothing etc which made everything feel gritty. as well as breathing it in.

---

**Consent comment:**

Do not let The quarry go ahead. It will impact the whole community's health and wellbeing, mentally and physically. and may contaminate the reserve water supply for rangiora.
