.	Regional and Strategic Leadership

Climate Change and Community Resilience portfolio comments:

climate change is probably irreversible now, better commit to research and development of alternatives as we can i think expect at least a 2-3m sea level issue in the next 100yrs or so. if we seriously have any interest in the community - other than for fleecing each time one comes up with an innovate idea, then relocation to higher ground over 100yrs or so would be wise, yet the exact opposite seems to prevail ... look at the hospital rebuilt on the worst ground with the least land space yet to build a new one out by the airport (new center of town) would have been cheaper and more prudent use of funds

Air Quality, Transport and Urban Development portfolio comments:

global warming will increase wind velocities so your brown shirts aka smoke police can be got rid of. buses are a total waste of effort fuel and smoke .. issue a book of uber tickets to each ratepayer and dump the buses.

Regional and Strategic Leadership portfolio comments:

beg pardon? what leadership? you mean focus upon fluffy fringe themes wont taker the hard yards sort the system out, prefer to maintain wasteful under used dinosaurs and pesky green line diseases ... how is that leadership?

Is the proposed increase in rates affordable for your household? Neither option is affordable
