The fact that ecan as an organization have seen the destruction of our environment over the years they have been in operation and now want to pass the buck to rate payers to try and make it seem like you are doing something. Allowing bottlers to take water for free with out taking in to consideration plastic pollution caused by bottlers, as well as issued around water being taken in the first place

Stop these useless misleading surveys where you are trying to influence the outcome to what ecan wants

It's pathetic that an organisation can ignore environmental issues that they should be in control of and suddenly want to do something about it at a massive cost.

Is the proposed increase in rates affordable as a whole for the Canterbury community? No

Any further comments on affordability for the community?

Let's get this straight. Ecan were supposed to be the protectors of the environment, they didn't and have overseen destruction of rivers and lakes and now want to fix the issues they caused but only if rate payers pay through the nose for it. No one with ecan should keep their jobs the lot should be sacked and start again
