\*Water purity for both drinking and for designated recreation areas, allocated rivers ,lakes and streams in popular areas, but understandably not all areas if too expensive to achieve. Lakes can be cleaned up by oxygen or even air injection operating through photovoltaic cells driving pumps and gas compressors

\*Solid, liquid and gaseous effluent can all be reduced by incineration which is technically advanced in many countries but not here. What are we afraid of, by using these techniques, because the high winds in certain areas are ideal for diluting emissions and energy produced can be used for industry.

\*Can't understand the connection between Covid 19 economic recovery and predator elimination, do

you mean in terms of tourism???

\*I could go on but that is enough.
