Any further comments?

Stop paddok fires and make it public for every one to know. This is ridiculous, we talking about electric cars and we burn fields like hundreds of years ago. The poisoning has to stop, sick of towns full of smoke in the middle of the day, at the end of summer, every year. What can you say about Ashburton air quality monitoring graph in the last couple of months? Not not mention the "pristine NZ " on the scenic route, all the way from Geraldine to the other side of Rakaia river, in a sunny day when you couldn't see anything around but smoke. How much carbon emissions we put in the air compare with one single smoking chimney we are suppose to report? Are you kidding?
