Water and Land portfolio comments:

More monitoring and enforcement required along with education for public and particularly offenders of their responsibilities and the implications of non compliance.

Air Quality, Transport and Urban Development portfolio comments:

More Consideration required in how bus network works to enable better interchange between bus lines, more interchange nodes, for example between 140 and 3 @ Ferrymead. More stops required around periphery of CBD to improve access to all of CBD. Reinstate free city centre circular bus route. Manchester st stops need to be reconsidered.

Regional and Strategic Leadership portfolio comments:

Much more coordination required between city, regional and central government on land use, transport and sustainability. Not sure why transport plan consultation was not part of this. With city and Ecan LTTP consultation in progress at same time, message to ordinary public is confusing and uncoordinated. Consideration given to borrowing more and keeping rate rise lower, I.e. option 1 with some borrowing to keep rate rise lower. This option should have been included in consultation docs?

Is the proposed increase in rates affordable for your household?

Option 1 is affordable

Any further comments on affordability for your household?

See my previous comments on borrowing to do option 1 with a lower rate rise.

Is the proposed increase in rates affordable as a whole for the Canterbury community?

Don't know

Any further comments on affordability for the community?

I can only comment from my point of view. Others may find rate rise difficult.

Would you support the use of borrowing for operating expenditure to offset some of the first year rates?

Yes

Any further comments on the use of borrowing for operating expenditure?

See previous comments borrowing and going forward on the basis of option 1 would be better.
