Hello.

Thanks for the opportunity to comment on Ecan's Long Term Plan.

There are 2 matters that I would like to comment on:

1. The state of rivers in Canterbury. Specifically the lack of water that they carry. It is clear to the casual observer of the low volumes of water in the rivers, that a huge amount of water is being syphoned off for irrigation and that this has been to the detriment of the natural rivers and waterway systems. This is not right, and needs to be remedied.
2. Having come from Wellington where using public transport is quite the "norm", I am all for using buses. We live on bus route 130 and I still cannot believe the number of times the bus goes past our home (both ways) with only one person in it – you guessed it – the driver. Our bus goes to Hornby, but **not** via the bus exchange in the City. This is fine for someone wanting to go to Hornby. But I am guessing that not many do, and hence the low passenger numbers. If they want more people to use the buses, then they need to seriously get their act together to cater for peoples travel needs.

My name is David Norris Pigou.

My address is

I do not wish to attend a hearing.
