**First name**

**Surname**

**Email address**

**Are you submitting on behalf of an organisation?** No, I'm submitting as an individual

**Are you willing to tell us more about yourself?** Yes

**Which age category are you in?** 65+ years old

**Which suburb or area do you live in?**

**Do you think we've prioritised the right issues and opportunities?** No

**What do you feel are the significant challenges and opportunities we face?**

We face Huge water purity related problems which in turn further relate to Quality of Life... Quality of the Rural environment including detrimental health of our Families ,Farm animals and indeed our Fish These are not new arrivals on our roadmap of life but caused by Lack of attention of ECAN; Regional services ,Dairy farmers and other land/water users /abstractors Many rivers and lowland streams are literally in their death throes wrt subsurface invertebrates and most fishes . this causes a knock on effect to other animals and organisms that depend on excellent water quality  
I submit that this grave error stands as nonsensical as allowing the export of drinking water to the Asians for a pittance..

**Which of the proposed options would you like to see us progress with?** Other option (please specify)

water Quality Must be very near the top of anything that is considered at this point in ECAN's future plan and effective remedial Action should ALREADY be in place from the middle of the last decade

**It is important that we hear what you would like to keep in the plan, what you think should be removed, and anything that you think we have missed?**

i see words indicating that water quality is on the cards for action but i see no graphic words of Imperative action in the document action by whom must do it and due date I wish to see actioned individuals and or organisations and those who are accountable by a due date in a word; Effective MANAGEMENT

**Do you generally support the activities proposed in the following portfolios:**
