I do / do not wish to speak to my submission (circle one)

I support:

1. The public being granted the opportunity to be heard, on any decision made by elected representatives or any delegated authority that has consequences for public health and the environment.

2. That Environment Canterbury prioritise and resource an urgent plan change to the Canterbury Land and Water Regional Plan, that actively provides for public input when processing resource consents that have consequences for public health and the environment. Until then, these consents should not be granted.

3. Other matters I would like Environment Canterbury to consider (continue overleaf if necessary):

- Education of farmers on how photosynthesis and respiration of plants (waterweed) cause oxygen depletion in rivers at night, and why they are so rampant in the streams.
- Support for farmers to make changes - financial, social, education and manpower.
- Quality water testing so results are accurate.
- Change value system so rivers/plants are not a resource but living entities.
