Long Term Plan 2021-31.

I support:

1. The public being granted the opportunity to be heard, on any decision made by elected representatives or any delegated authority that has consequences for public health and the environment.
2. That Environment Canterbury priorities and resource an urgent plan to the Canterbury Land and Water Regional Plan, that actively provides input when processing resource consents that have consequences for public health and the environment. Until then, these consents should not be granted.
3. Other matters I would like to bring to your attention is the use of 1080 and how cruel and damaging to all living life form. I request/demand (as it is our right to breathe healthy air and clean water) that this be stopped immediately.
4. As for residents in Christchurch and water usage, there shouldn't be a water charge on top of what we already pay in our rates. If irrigation used on our dairy farms were to be halted and find an alternative use for the Canterbury plains there would not be a shortage.
