Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

David

Last name

Welford

Email address

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

Prefer not to say

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

People need to take ownership for their own transport or \$1.00 for students and community services cardholders

Any other comments on bus fares?

Smaller vehicles more often. Electric or Hydrogen is my opinion is best

Is borrowing and repaying through general rates the right approach for this regionally significant event?

No

How else might we pay for our share of this work?

Progressive work ongoing within existing rates

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

I would think that I do not pay for any of this? Roads board! NZ rail should pay their own way. Transpower should pay for their own infra-structure.

Which option for distribution of rates in Ashburton River rating district do you support?

Option 1 (preferred): Redistribute rates in the Ashburton River rating district.

Any other comments on flood protection in Ashburton?

No, I live in Timaru. Split up ECAN into districts for funding

Would you support a levy to accelerate action in response to climate change?

No

Any other comments on future funding for responding to climate change?

Central Government should subsidise or pay for this. Instigate a similar system Like they will for our three-way water funding

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Your organisation is very good at recording the effects of Climate change. But you appear to have no teeth in enforcing your findings. For example. Requiring Farmers to "reduce" cattle they have on farms. Halving would be good for a start. Moving now of old rubbish dumps that are near the sea. Heavy fines for people that burn rubbish in farming areas. Like rubber tyres. Burn off of stubble for farmer should be stopped. These are some examples I can think of that readily come to mind.

Where did you hear about the consultation?
