Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

Because not many under 25s don't pay rates so I feel that those paying for it in their rates should receive some benefits also. Also if it was only \$4 a day for adults to get to and fro work you would find the busses would be well used.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

No

How else might we pay for our share of this work?

Cut back on other costs. You can't keep putting rates up every year it is unaffordable for most to keep up with the high increases

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Insurance - there should be money put aside for these weather events

Which option for distribution of rates in Ashburton River rating district do you support?

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

Would you support a levy to accelerate action in response to climate change?

Don't know

Where did you hear about the consultation?
