No

Which bus fare structure option would you like to see trialled?

I don't have a preference

Tell us more about why you support the selected bus fare option.

I don't I think the proposed rate increases are a disgrace for a public transport system that doesn't work, spend your time make a public transport system that sells itself rather than relying on rate payers most of which can't use it to get to work etc due to the poorly planned and operated routes

Is borrowing and repaying through general rates the right approach for this regionally significant event?

No

How else might we pay for our share of this work?

Those effected should pay

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Rail, state highways and power should be paid for by the entities that own them ie lines companies, NZTA and kiwi rail the rest should be paid for by what's already available

Which option for distribution of rates in Ashburton River rating district do you support?

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

Would you support a levy to accelerate action in response to climate change?

No

Any other comments on future funding for responding to climate change?
