Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Nicole

Last name

Mulcahy

Email address

Suburb

Burwood, Christchurch

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

While I hold a mobility card I think the \$2 flat fare for adults and children and \$1.20 is sufficient as going to and from work and paying this rate is only \$20 weekly for 5 day working week is suitable especially comparing to recent fuel prices

Is borrowing and repaying through general rates the right approach for this regionally significant event?

No

How else might we pay for our share of this work?

Collaraberation with landowners groups communities and businesses to undertake management in their local area instead and reduce the cost needed raised by rates

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Some from rates but in our current climate, flood recovery and natural disaster weather events and going to become more and more regular so raising rates to fund these recovery efforts each year is not sustainable and no one can afford this huge annual increase

Which option for distribution of rates in Ashburton River rating district do you support?

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

Any other comments on flood protection in Ashburton?

Don't waste money by planting natives in river bed for flood management in spring when it is likely to flood the week after and all that money and time is wasted

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Government subsidies for natural material in building, retail industries. Minimise Plastic pollution incentives. Not development of coastlines or tracks that are just going to be regularly flooded

Where did you hear about the consultation?

Social media (Facebook, Instagram)
