I don't have a preference

Busses i see usually have very few people on them

---

**Any other comments on bus fares?**

Last time i rode on a bus it would have been cheaper to get a taxi or uber to drive me and my kids the short distance.

---

**Is borrowing and repaying through general rates the right approach for this regionally significant event?**

No

---

**How else might we pay for our share of this work?**

Reduce bureaucracy costs to actually have the money for action. Costs more to pay councilors, consultants, and paperwork than to actually DO the work.

---

**How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?**

see above. Also wish to see some sort of accountability for if a roading company does a poor job that they have to fix it at their cost, not just put up with new bumpy dangerous roads because of poor workmanship

---

**Which option for distribution of rates in Ashburton River rating district do you support?**

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

**Any other comments on future funding for responding to climate change?**

No Answer

---

**Any other comments on Environment Canterbury's draft Annual Plan or other matters?**

Money hungry fatcats with no plan just want to provide more pain the the ratepayer. ecan does very little for the money that they squander, seeing as the ccc does what ecan is supposed to be, i say abolish these fanciful idealists and provide the funding to council to DO not sit around dreaming up new ways to spend money
