Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

65+ years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

We need to get some revenue from operating buses and encourage less use of cars to save the planet. New buses should be electric.

How else might we pay for our share of this work?

Sell the river gravel from the river bed for concrete production, roading etc.

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

1/ Insurance if available 2/ Borrow the money and pay it back over time

Which option for distribution of rates in Ashburton River rating district do you support?

Option 1 (preferred): Redistribute rates in the Ashburton River rating district.

Any other comments on flood protection in Ashburton?

If the shingle from the river is sold the removal this removal could be controlled in order to make clear flood flow under bridges and if not increase the bases around the piers to prevent erosion/ undermining

Any other comments on future funding for responding to climate change?

I am not sure that you have an effective say over the Heathcoat and Avon rivers if so I would like to comment on the Estuary and the outflow to Sumner. I have lived next to the estuary for 22 years and I have observed a continued build up of silt over that time. The outlet needs to be dredged to allow better outflow in order to reduce flooding up stream
