Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

Make a low cost \$2 fare across any distance accessible to everyone not a select few. (Dont discriminate)
London introduced a \$2 fare and loads of people jumped on buses.

Any other comments on bus fares?

Currently they are too expensive especially if you are a family wanting to go anywhere

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

No ideas but I'd focus on preventative actions up stream

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Land transport should pay for highways and bridges not local government. Power should be paid for by transpower not local government bodies.

Which option for distribution of rates in Ashburton River rating district do you support?

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

Any other comments on flood protection in Ashburton?

Remove buildup of debries up stream to minimise buildups being pushed down stream

Would you support a levy to accelerate action in response to climate change?

No

Any other comments on future funding for responding to climate change?

People are already doing it financially tough. Putting more financial pressure on them will only push them away. My family is thinking a about moving away due to high cost of living. Christchurch is great to live in but its becoming expensive.
