Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Marc

Last name

Nicholson

Email address

Suburb

Oxford, Oxford

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

I don't have a preference

Tell us more about why you support the selected bus fare option.

I do not take the buses but would support the standard, most beneficial for all and least expensive option with unnecessary expenditure curtailed, especially in light of these challenging economic times.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

No

How else might we pay for our share of this work?

Not an expert on the economics of it but there should be plenty in the govt coffers to support these real, realized catastrophes.

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Govt again. Stop wasting money on useless artworks and slides and make real tangible difference to people's lives.

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Would you support a levy to accelerate action in response to climate change?

No

Any other comments on future funding for responding to climate change?

Can any mention of wasting money in preventing climate change. Rather focus on actual sustainable farming practices by taking advice from people on the ground and fostering and supporting education and relationships with parties that focus on these. The climate is changing, always, so don't pour money down the drain but work to adapt and improve sustainability without destroying the reason we do all of this - for the people.

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Let's focus on getting it right with people that have real experience on the ground and not just people like politicians and scientists who have never worked a day in a field in their lives.

Where did you hear about the consultation?
