Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Mike

Last name

Davies

Email address

Suburb

No Answer

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

65+ years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

will encourage people to use buses

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

How else might we pay for our share of this work?

Please take a whole catchment approach and have consents that are affordable and workable .Make it so adjoining land owners can protect their assets ie land, buildings, roading, bridges etc etc

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

We need to have a proper whole catchment plan that does proper preventive maintenance before an event happens. This needs to be done in a cost effective way where the likes of mudfish are not the top priority.

Which option for distribution of rates in Ashburton River rating district do you support?

Option 1 (preferred): Redistribute rates in the Ashburton River rating district.

Any other comments on flood protection in Ashburton?

Its not just Ashburton , all rivers in Canterbury have issues ,some big ,some small

Would you support a levy to accelerate action in response to climate change?

Don't know

Any other comments on future funding for responding to climate change?

Anything the council does needs to be practical and able to be applied by ordinary people rather than some expensive theory

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Please do not make things like mudfish or birds more important than producing farms, peoples houses, bridges and the like when it comes to doing river bed maintenance. Yes the wild life is important but in the long term the wildlife will be better off with a good river plan

If you would like to give feedback via video, add a link to YouTube clip or Dropbox file below

do not do any of the above

Where did you hear about the consultation?
