Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Christopher

Last name

Stuart

Email address

Suburb

Hornby, Christchurch

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

65+ years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

For climate change reasons we need to target the entire population base with a much more dynamic public transport option that encourages private vehicles off the road for every day commute.

Any other comments on bus fares?

An investment in really low fares should be offset by reduced maintenance and running cost in our current road structure. I don't see this factored in as yet

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

We need proper insurance on infrastructure

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Insurance and better planning on where infrastructure is placed and more appropriate standards of construction

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Any other comments on flood protection in Ashburton?

Current approach is not sustainable in the long term. You cannot keep boxing in a braided river.

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

We urgently need to rethink how and where we live and transport ourselves. Seems like we missed the opportunity with the Christchurch rebuild.

Any other comments on future funding for responding to climate change?

Funding needs to target projects that have significant pay off in a very short time frame.

Where did you hear about the consultation?
