No

Which bus fare structure option would you like to see trialled?

I don't have a preference

Tell us more about why you support the selected bus fare option.

I understand that the different options benefit different people in different situations. What I do agree on overall is cheaper bus fares would be beneficial especially in consideration to rising petrol prices but also climate change. Encouraging people to carpool using public transport instead of their own vehicle wouldn't do much compared to reducing carbon emissions of the top polluters, but it's a start!

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

Yes
