Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

It allows those on low income the ability to travel for work or school without worrying about fuel costs getting warrents or otherwise. It will mean buses are actually used to capacity which is better for both the environment and commuters.

Any other comments on bus fares?

My biggest issue with the bus system is almost all the buses go through the middle of town making the travel time for getting some where on the same side of town but on a different bus route. Maybe it would be better to have more varried bus routes on lower frequency than less routes on higher frequency

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

Any other comments on flood protection in Ashburton?

Maybe we should be paying into an emergency fund for events such as these for now this could be used to repay the money borrowed from general rates the latter to build up for times such as these

Would you support a levy to accelerate action in response to climate change?

Don't know

Where did you hear about the consultation?
