No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

I think you need to target the workforce driving into the CBD each day. Ever since the park and ride 92 Kaiapoi bus started it has changed my life. Taking the bus not only saves me money on petrol and city parking fares (and Wilson fines) it takes the commute stress away. Luv the chill time on the bus. If you want to target getting more and more cars off the roads make it so reasonably priced that the workers commuting into town each day would see the huge savings. Win for the planet and win for their pocket... You want to entice people..especially workers that travel alone onto public transport. Seeing as CHCH does not have light rail the direct services are a must and a \$2 Metrocard fare would be a real gamechanger.. especially with petrol prices continually rising...

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

Which option for distribution of rates in Ashburton River rating district do you support?

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

Would you support a levy to accelerate action in response to climate change?

No
